## LOCAL COPS IN SHOPS

Blandford SNT have been running regular drop in meetings at local businesses and coffee shops in the town throughout January. These meetings have allowed local Officers to be more accessible to their communities whilst also making it easier for members of public to come and chat about any problems, concerns, etc in person to officers without the need to attend the Police Station.

Below is the list for February detailing when and where your SNT officers are going to be:

## CHANGES TO

The PACT process has been reviewed nationwide and it has been decided that Blandford PACT will be run under a slightly different format. Quarterly public meetings were held where most issues could be dealt with very quickly and did not require the 3-month time-span they were given.

Therefore, we have decided to bring PACT out into the community on a regular basis instead of making the public come to us! We will be running specific PACT surgeries complimenting the current Cops in Shops meetings, where members of the PACT panel will join members of Blandford SNT at various locations throughout the year and listen to the issues affecting the community. This will not only allow us to better interact with the general public and local people but also deal with issues in a more timely and effective capacity!
